Your Health Our Priority!

@zirconhomecare

About us

With three decades of public service experience, we are foraging in to the home health care services platform, that offers first of a kind complete home health care services with a strong team of well trained, professional health care specialists. Before launching our services, we did a comprehensive survey in Chennai, the city that unfortunately is the leader in elderly living alone in the country and found out that the home health care sector badly lacks a trusted service provider who keeps the customer's interest as the top priority.

Issues related to Safety and Security of the service seeker needed to be addressed and we have devised a system that offers the best Safety and Security for our customers while providing world class health care systems at your door step.

Why Zircon

The transforming healthcare scenario in India has led to the advent of Home Health care services at home for the convenience of patients and their families.

Zircon has redefined the healthcare landscape in India over the last few decades with its mission of delivering quality healthcare to millions of Indians. In keeping with this mission, Zircon Home Care with its unique treatment options delivers clinical excellence with compassion and care to the comfort of your home.
